Rahul Gangwar

rahulgangwar2625@gmail.com | LinkedIn | GitHub | X | Bareilly, India

Summary

Full-Stack Developer with hands-on experience building scalable web applications using **React.js, Next.js, Node.js, TypeScript, MongoDB, and PostgreSQL**. Skilled in **REST API development**, **authentication systems**, **real-time applications**, **Prisma ORM**, and modern deployment workflows. Strong understanding of software engineering principles, database design, and responsive UI development, with a passion for solving real-world problems through technology.

Technical Skills

Programming Languages: TypeScript, JavaScript, C, C++, HTML5, CSS3, SQL
Frontend: React.js, Next.js, Redux, Tailwind CSS, Framer Motion, Responsive Web Design, Browser APIs
Backend: Node.js, Express.js, REST APIs, WebSockets, Socket.io, JWT Authentication
Databases: MongoDB, PostgreSQL, Redis **ORM / Data Layer**: Prisma ORM, Mongoose
DevOps & Tools: Docker, Docker Compose, Kubernetes (K8s), Git, GitHub, Linux, AWS EC2, Nginx, npm, VS Code
Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, Authentication & Authorization, JWT, API Design, MVC Architecture, State Management
Deployment: Vercel, Netlify, MongoDB Atlas

Experience

Full Stack Developer - SwitchYourVendor *Jun 2026 – Present*
Remote | Gurugram, Haryana, India

- Built **MarketPulse**, a full-stack SaaS platform for **real-time market analytics, stock screening, historical analysis, and trading insights**, contributing across frontend, backend, data processing, and system integration.
- Developed the frontend using **Next.js, React, TypeScript, Tailwind CSS, Zustand, and TanStack Query/Table/Virtual**, implementing interactive market dashboards, stock detail views, historical analytics, dynamic tables, pagination, filtering, sorting, and responsive UI workflows.
- Engineered backend services with **Python, FastAPI, PostgreSQL, SQLAlchemy, Redis, Pandas, DuckDB, Apache Parquet, PyArrow, and AWS S3**, including live-market caching, historical-data access, metadata management, and scalable data-processing workflows.
- Implemented a **real-time market-data pipeline** integrating Upstox with **APScheduler, Selenium/PyOTP, Redis, LiveCache, and WebSockets**, using snapshot diff detection and delta updates to efficiently propagate live market changes to connected clients.
- Developed a **custom query and scanner engine** with expression parsing, AST-based conditions, DuckDB SQL translation, dynamic filtering, historical/live execution modes, scanner presets, saved queries, and subscription-based feature entitlements.
- Implemented **Google, Upstox, and Zerodha OAuth**, secure session management and account linking, along with **Razorpay subscription billing, webhook verification, plan entitlements, user preferences, admin dashboards, audit logs, payments, and support workflows**.

Software Developer - VerifyDev (Project) *Jan 2026 – March 2026*
Remote | verifydev.me

- Led migration of production application from **React.js to Next.js**, refactoring **200+ files** to implement improved routing and architecture.
- Implemented modern rendering techniques including **Server-Side Rendering (SSR)** to enhance **performance and SEO**.
- Contributed **25+ merged pull requests** with over **5000 lines of code**, maintaining quality through peer code reviews.
- Collaborated with developers to fix production bugs and improve **UI/UX** across frontend repositories.
- Worked in an **agile startup environment** using Git workflows, feature branching, and continuous improvements.

Projects

Krishi Fair – AI-Powered Agricultural Marketplace *Mar 2026*
Tech Stack: JavaScript, React.js, Prisma ORM, Cloudinary, MongoDB, Node.js, Express.js, Google Gemini AI

- Engineered a context-aware agricultural chatbot using **Google Generative AI (Gemini)**, delivering **real-time crop advisory**, pest management strategies, and personalized market insights.
- Implemented **Prisma ORM** with **MongoDB** in a **Node.js/Express.js** backend, enabling **schema validation**, **type-safe database operations**, and efficient relationship modeling.
- Integrated government **Mandi and Weather APIs** with **caching mechanisms** to provide live MSP updates and agro-climatic advisories.
- Configured **Node-Cron** for **automated auction expiry**, **winner declaration**, and **idempotent bid processing** across marketplace workflows.
- Integrated **Cloudinary** for **CDN-optimized multipart image uploads**, storage management, and real-time image transformations.

Weather Dashboard *Oct 2025*
Tech Stack: React.js, TypeScript, OpenWeatherMap API, Geolocation API, CSS3

- Developed a **responsive weather dashboard** providing **real-time weather conditions** and **5-day forecasts** using OpenWeatherMap APIs.
- Implemented intelligent **day/night detection** using sunrise and sunset data, enabling dynamic weather icons and adaptive UI themes.
- Integrated **browser Geolocation API**, **city-based search**, and weather-specific animated components to enhance user experience.
- Designed **modular React components** and **TypeScript-based architecture** with robust API handling, loading states, and error management.

Achievements

- Secured **5th Rank** at National Level **FU Nexathon 2026** among **100+ teams** by building a full-stack application within 8 hours.
- Built and deployed **15+ full-stack web applications** using React.js, Next.js, Node.js, TypeScript, MongoDB, and PostgreSQL.
- Collaborated in teams of up to **5 members**, contributing to project planning, feature implementation, and task management.

Certifications

- **Full Stack Development Internship** Certificate – Internshala, Apr 2026
- **Software Testing Internship** Certificate – Internshala, Apr 2026

Education

Dr. A.P.J. Abdul Kalam Technical University *2023 – 2027*
Bachelor of Technology in Computer Science and Engineering **CGPA: 7.15/10.0**
